

Kitchen Together Litepaper v1 Public Preview (EN)

Status: Public Preview (Testnet-Only)

Release Date: 2026-02-27

1. What We Are Building

Kitchen Together is building a creator-focused map marketplace that combines:

- Web-based crypto marketplace flows
- Reliable game unlock sync
- Points-first growth model with compliance-safe messaging

The current release is testnet-only.

2. Why This Matters

Traditional in-app models create limits for creators and users:

- High platform fee pressure
- Limited creator monetization
- Weak ownership transparency

Kitchen Together aims to solve this with a phased web-first model.

3. Current Scope (Public Preview)

Included in this phase:

- Primary-sale marketplace flow on web
- Linked web/game identity checks for sensitive actions
- Purchase-to-unlock entitlement sync flow
- Points for ranking and campaign eligibility

Not included as commitments:

- Mainnet launch date
- Guaranteed token allocation or airdrop
- Guaranteed point-to-token conversion

4. Core Policy Boundaries

- No guaranteed airdrop/token/profit claims
- No crypto trading UI in mobile app
- No mandatory product-layer KYC for core preview usage
- Third-party providers may require KYC/age checks for trading/cash-out

5. Tokenomics Positioning

Current framework:

- Treasury release + burn model
- Hard cap narrative retained

- Detailed fee split/vesting/unlock/issuance timeline are Subject to Final Spec

6. Reliability Targets

Purchase-to-unlock targets:

- P50 <= 30 seconds
- P95 <= 5 minutes
- P99 <= 15 minutes

If delay exceeds threshold, support re-sync and escalation flow should be available.

7. Roadmap Direction

- Phase 1: points-first + primary web sale
- Phase 2: conditional reward campaigns
- Phase 3: controlled on-chain expansion when KPI + compliance gates pass

Mainnet remains a future conditional milestone with no committed date in this release.
